

IN THE BUSINESS OF CHANGING LIVES

When you were a child, would you find things, take them apart, and try to put them back together with no instructions? If yes, then you would be just like Dr. Kevin Sharif, one of the finest Orthopedic and Spine Surgeons Las Vegas has seen yet.

As a young curious child, Dr. Sharif was fascinated with fixing things. How form related to function to make something work properly deeply intrigued him. Dr. Sharif knew very early that he wanted to learn more about the structure of the body and how to put people back together. Spine surgery was the culmination of this desire.

Moving to the valley just 4 years ago, Dr. Sharif is quickly making an incredible name for himself as a surgeon and healer for our community at Nevada Orthopedic and Spine Center. Sharif says, "There is something so incredible about the spine, how it controls so much of your body. With one small fix or a surgery, people can get back something that they've lost."

Using the country's latest minimally invasive robotic guidance system, the Mazor X, along with his own multifaceted expertise, the sky is truly the limit for Dr. Kevin Sharif and for your spine health.

He continued that there is a physical manifestation of your body's reaction to your pain or degeneration, and there is also an emotional factor as well. People can live full and active lives, and then suddenly be bound to a wheelchair because their symptoms have progressed so quickly. He finds it extremely rewarding to be able to give his patients back part of their life, to help them overcome obstacles and become joyful again.

Looking to be the one stop shop when it comes to your spine health, Dr. Sharif became very well rounded in his training and fellowship, by not only specializing in orthopedic spine surgery, but also receiving additional training in neurosurgical spine surgery. Able to come at challenges from all perspectives in the operating room truly gives him an edge to be able to work on spine issues from top to bottom. Whether

it be pediatrics, scoliosis, tumors, trauma, or degenerative spine issues, Dr. Sharif can help you.

When it comes to spine problems, most people do not need surgery. But that doesn't mean that Dr. Sharif can't help you, more so he can direct you to exactly what you need to do to help alleviate your symptoms, whether that be with physical therapy or injections, or an overall change in your health. Dr. Sharif is dedicated to providing only the best care for his patients and will not offer surgery unless it's 100% needed.

Since moving to Las Vegas from the Midwest, Dr. Sharif fell in love with Las Vegas, well everything except the heat! This town is full of excitement, beautiful sunny days and incredible growth and opportunity, especially for young professionals. Dr. Sharif became dedicated to providing care to our local community's frontline and state workers, including those in Metro, the CCSD, Highway Patrol, Fire & Rescue, Nurses, and the list goes on.

Over the years, Dr. Sharif's practice has shown phenomenal growth, and the community has shown him so much love and appreciation. Using the country's latest minimally invasive robotic guidance system, the Mazor X, along with his own multifaceted expertise, the sky is truly the limit for Dr. Kevin Sharif and for your spine health. If you have any sort of spinal pain or a chronic condition, call Dr. Sharif and see how your spine health can be improved or fixed, because after all, he is in the business of changing lives.
